

Coaching Strategic Plan and Pathway

To become a leading association by having experienced and qualified coaches at all levels with a clear and transparent pathway for progression whilst providing a safe, fun and quality experience for all involved within the sport, and align ourselves with Hockey NZ Development framework. By having these pathways we will give our coaches and players more opportunity to reach their potential.

Goals:

- To have all Junior Team Coaches qualified to a Community Based Module level by 2014
- All Representative Team Coaches having completed the Extension Modules for that particular age group by 2015
- To have youth and senior coaches qualified to at least a Community Based Module level by 2015

What Benefits are there from having a coaching pathway?

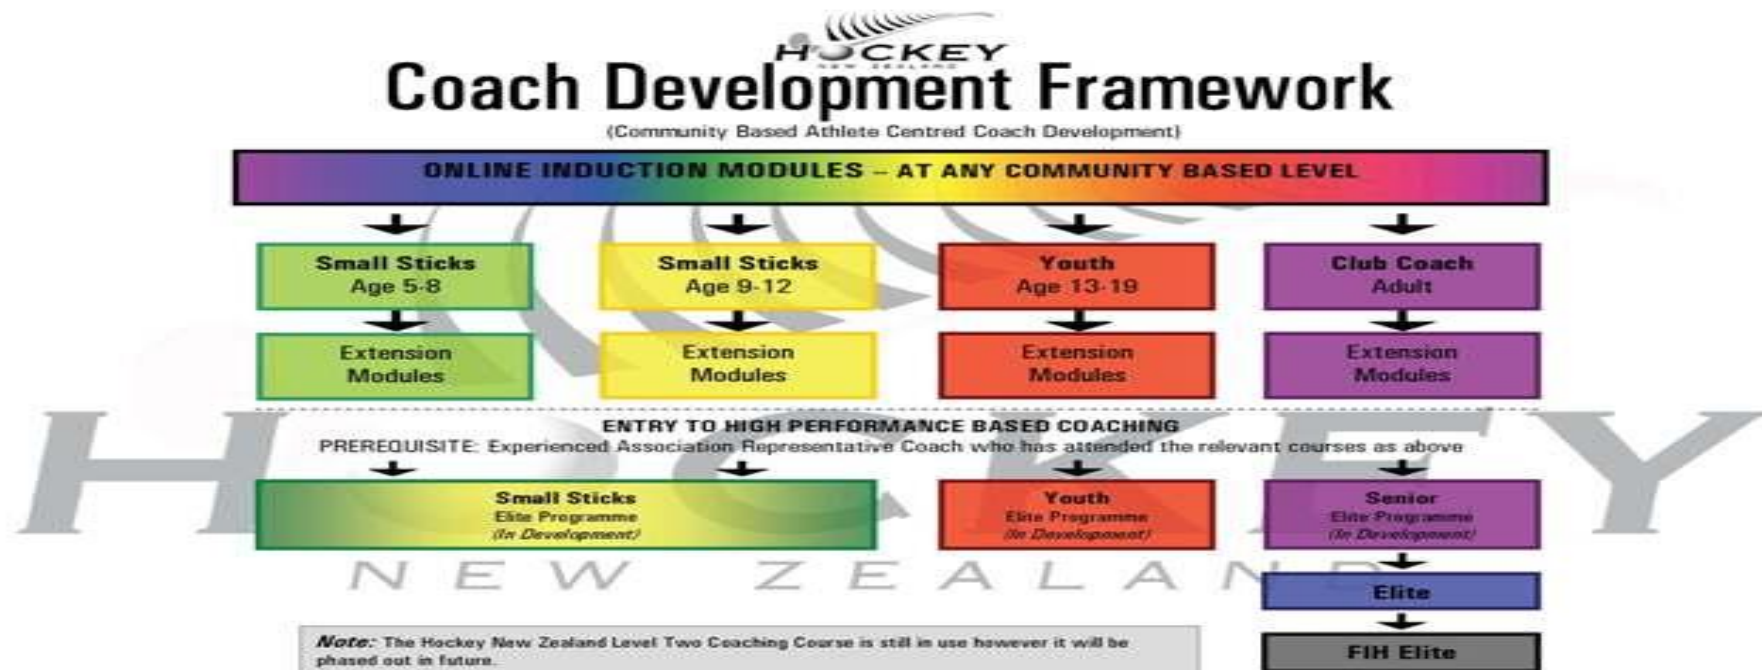

The coaching pathway will provide direction and accountability, while giving consistency and clarity to players, coaches, volunteers and parents

Players

- Support through better quality coaching and highly informed coaches
- Retention of players as their satisfaction will be increased by an improvement in performance at whatever level of the game they play.
- Player development will be enhanced with a structured and communicated player pathway enabling more opportunity for the players to reach their potential

Coaches

- Coaches will be more likely to achieve their potential
- Access to personal development and training
- A network for coaches
- Access to the latest resources
